FULFIL YOUR DREAM WITH US!

Do you dream of a perfect and extremely healthy look? Now you can fulfil your wish. The revolutionary new E-Fit Beauty&Slim device helps you get as close as possible to your dream body shape.

At Fit-Pro Ltd. we believe that a beautiful and healthy body is a value that should be strengthened and protected against the unavoidable challenges of ageing. There is no happiness and shining without a healthy body. That is why we offer personalized, combined and complementary solutions for our clients to reach their goals.

Our company has been a market leader in EMS devices for more than 10 years. Now we would like to introduce the knowledge and experience we obtained through long years into the beauty industry as well, so that you will also be able to experience the world-known E-Fit effect

THE E-FIT BEAUTY&SLIM

is a revolutionary new device that utilises a technology unique in the whole world: it combines the highly effective and positive effects of EMS (Electrical Muscle Stimulation) technology and infrared heat-therapy, making it an efficient method both in the beauty and fitness sectors.

It offers a fantastic opportunity for beauty salons, spas and wellness centres. In addition to the standalone application of the passive treatments, the E-Fit Beauty&Slim device may also be used as a complementary treatment in parallel with other cosmetic treatments.

EMS TECHNOLOGY

Electrical Muscle Stimulation, or EMS, is a technology based on several decades of research and development work, and is successfully applied in the areas of fitness, rehabilitation as well as the beauty industry.

EMS technology passes on stimulation directly to the muscles, causing the muscles to contract and then relax in a concentrated form.

One of the main benefit of muscle stimulation comes from the intense muscle contraction, which effectively reaches the deeper muscles as well. Furthermore, the EMS technology plays a major role in improving blood circulation and increasing the metabolism to remove the excess by-products.

INFRARED HEAT-THERAPY

The E-Fit Beauty&Slim provides all the positive effects of the infrared heat-therapy.

Scientific researches attribute numerous benefits to infrared heat-therapy with a history going back thousands of years.

These include the following examples: improving metabolic processes of the cells, accelerating the degradation and elimination of waste materials, eliminating cellulite and decreasing fat deposits; they also help activate the immune system and self-healing mechanisms. Calorie burning also increases as a result of a boosted blood supply.

Thus, due to the effect of the infra heat-therapy our body is able to detoxify itself, and the skin eventually becomes more supple and tight. Heat also alleviates muscle stiffness, facilitates relaxation and relieves chronic musculoskeletal pain.

BUSINESS, DREAM, REALITY

With a simple and convenient treatment, the use of the E-Fit Beauty&Slim device has many positive effects on the body, in a quick and spectacular way. The treatment is painless and safe, there is no risk or side effects. High quality is guaranteed by international certificates as well.

The E-Fit Beauty&Slim treatments require a minimal space footprint: a simple treatment bed is enough; also it can be combined with other beauty (e.g. facial) treatments.

Thus, you can increase the capacity utilization of your business with this superb market expansion opportunity, helping yourself to return of your investment quickly.

*SUITABLE FOR RELIEVING BACK PAIN PAIN
RELIEF WITH TENS TREATMENT MUSCLE

STIFFNESS STRENGTHENING BACK
MUSCLES*

THERMOCARE JACKET

The ThermoCare Jacket is a heatable EMS jacket for relieving and treating spine and back problems and alleviating the stress in the back.

The heating system of the ThermoCare Jacket utilises long infrared waves, which penetrate deeply into the tissues, this way they may boost the metabolism and blood circulation. Relaxing the tissues may reduce and even completely eliminate any pain the patient may have.

THERMOCARE SHORTS

Heatable EMS shorts for passive treatments, developed for the problematic areas

The infrared waves are especially harmless, since they are able to penetrate through the upper layers of the skin without being absorbed by them. The heating effect is produced in the deeper layers, this stimulates the blood circulation potentially improving the oxygen supply of the organs, the blood vessels will dilate, and the whole circulatory system may be activated.

*BOOSTS LOCAL BLOOD CIRCULATION

RELAXATION / MASSAGE / BODY SHAPING
HILL / CARDIO / INTERVAL

E-Fit places strong emphasis on the development of use-oriented training programs, regardless of whether this use is passive or active. The highly effective and research-driven programs drive quicker results in a short time – this effectiveness ensures a competitive advantage for our other E-Fit products as well. Beauty treatments of this type are extremely popular thanks to their effectiveness and convenience.
